Education

New York University Abu Dhabi, BS in Computer Engineering May 2028
• GPA: 3.95/4.0

Experience

Peer Tutor – Mathematics, Academic Resource Center, New York University Abu Dhabi Aug 2025 – Present

- Provide one-on-one and group tutoring sessions for undergraduate students in Calculus I–III, supporting comprehension of topics including limits, derivatives, integrals, partial derivatives, multiple integrals, and vector calculus.
- Assist students in developing problem-solving strategies and improving academic performance.
- Collaborate with faculty and the Academic Resource Center to identify and address students' learning needs.

Events Coordinator, OxCAB (Cybersecurity Student Interest Group) Apr 2025 – Present

- Planned and coordinated events by generating ideas, securing venues, managing budgets, promoting on social media, ensuring logistical readiness, arranging catering, and documenting post-event feedback.

Intern, Voltaat - Doha, Qatar Jan 2023 – May 2023

- Designed and printed 3D models requested by customers, from students to medical professionals. Created demo robotics projects to inspire customers. Used Arduino, Onshape, Crealty Printers.

Head Of IT, QIS MUN - Doha, Qatar Jan 2023 – Jun 2023

- Coded and hosted a website for publishing information; Trained IT support team; Managed IT team and fixed technical issues faced during conferences. Used Javascript and React for the web site(<https://msaidalizada.github.io/Qismun/>).

Projects

Bug Bounty Hunting

- Perform independent security testing of web applications through bug bounty programs.
- Develop proof-of-concept exploits and detailed technical reports for remediation.
- Discovered and responsibly disclosed a critical severity (CVSS 9.8) zero click account takeover vulnerability in a international telecoms provider.

Logic Goat – Logic Circuit Builder & Simulator github.com/MSaidAlizada/LogicGateSim

- Developed a desktop application that allows users to design and simulate custom logic circuits using AND, OR, NOT, and other logic gates.
- Implemented save/load functionality for circuit designs, enabling persistence between sessions.
- Created an interactive interface for real-time simulation.
- Tools Used: Python, Pygame

CTF & Lab Write-Ups

- Maintain a personal website documenting Capture The Flag (CTF) challenges, penetration testing labs.
- Provide detailed technical walkthroughs, exploit explanations for educational purposes.
